SISTEMA ATLAS

ATLAS SYSTEM

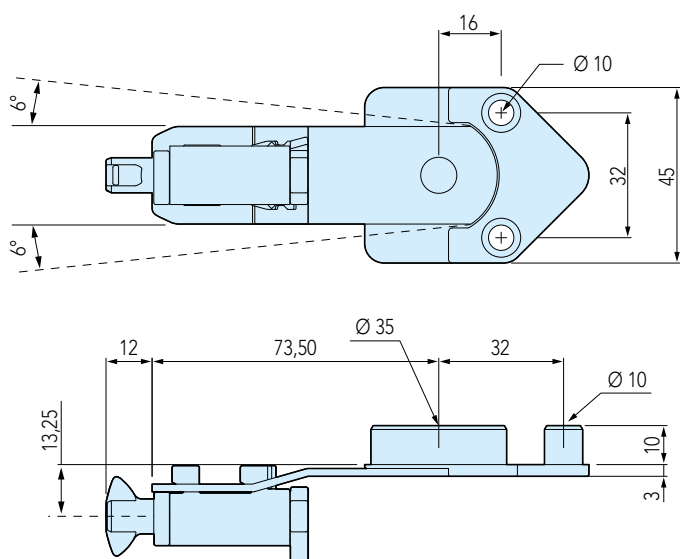

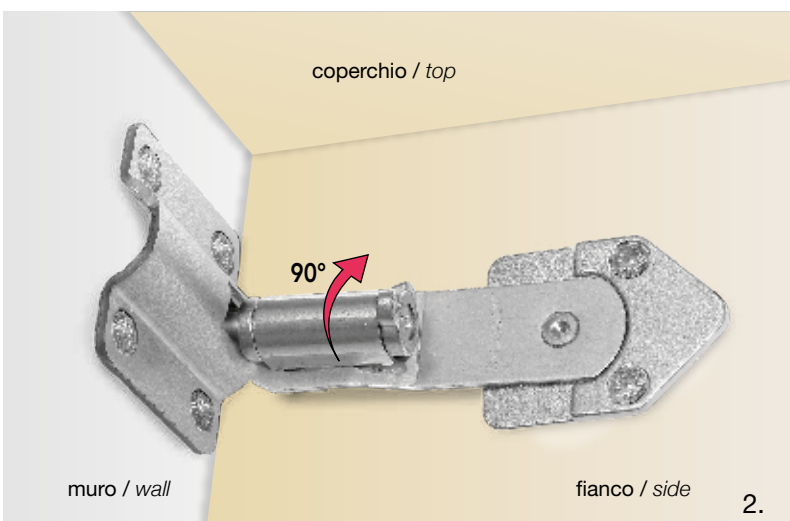

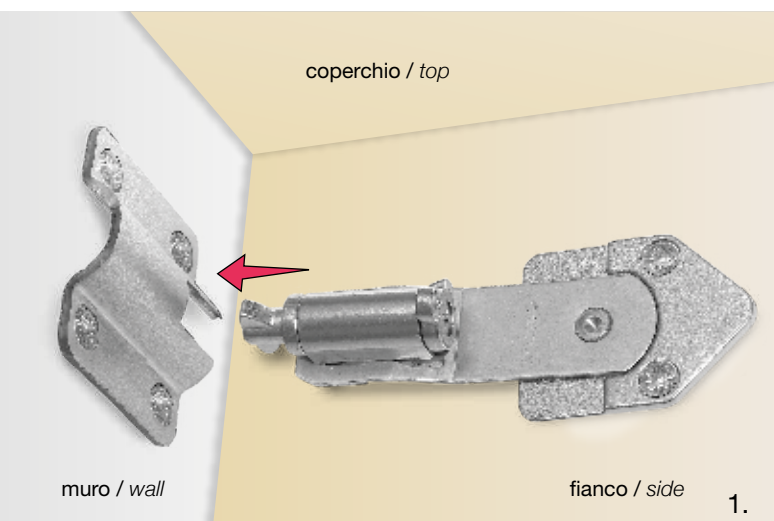

Atlas è la soluzione più sicura e idonea per i grandi mobili sospesi fissati al muro. Si compone di un tirante a parete e di una staffa di sostegno per grandi pesi. Esso trova impiego in tutti gli ambienti della casa come: cucine, bagni e soggiorni. Il sistema Atlas supera le limitazioni tecniche delle attaccaglie tradizionali finora proposte sul mercato.

Atlas is the safest and most suitable solution for attaching large suspended cabinets in the kitchen and bathroom. It is the most effective system for the new suspended modules that feature greater depth and large drawers. Atlas overcomes the technical limitations typical of conventional attachments.
