JACK

Jack è il nuovo Reggicristallo della Perin SpA che, attraverso la protezione laterale plastica, evita la possibile rottura accidentale del piano in cristallo dovuta allo scuotimento durante il trasporto o la manipolazione del mobile. Nella sua progettazione è stata posta una particolare attenzione alle nuove tendenze stilistiche per coordinare Jack al mobile che lo accoglie.

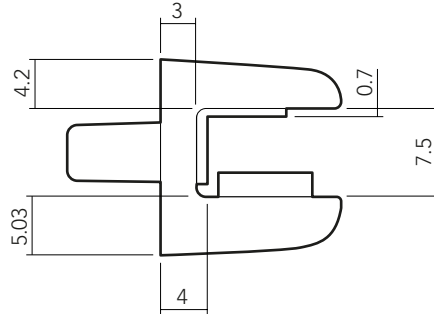

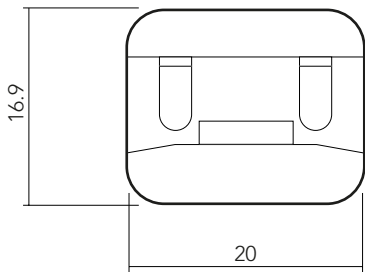

JACK

Jack is the new glass shelf support by Perin SpA. The protective plastic side protects the glass shelf against accidental breakage when the unit is being transported or handled. It has been designed with an eye to new stylistic trends, to ensure Jack coordinates with the unit it will support.
