TECH

Tech è il nuovo reggicristallo sviluppato da Perin SpA, progettato per offrire una maggiore protezione del piano in cristallo durante il trasporto e la movimentazione del mobile.

La particolare protezione in plastica riduce il rischio di rotture accidentali causate da urti, scuotimenti o sollecitazioni durante le fasi di trasporto e manipolazione.

Il design di Tech nasce inoltre dall'attenzione alle più attuali tendenze estetiche, con l'obiettivo di integrare armoniosamente il reggicristallo nel mobile, valorizzandone l'aspetto e mantenendo un risultato coordinato e contemporaneo.

TECH

Tech is the new glass holder developed by Perin SpA, designed to provide enhanced protection for the glass panel during the transportation and handling of the furniture unit.

The specially designed plastic protection helps reduce the risk of accidental breakage caused by impacts, shaking or other stresses during transportation and handling.

The design of Tech also reflects the latest aesthetic trends, with the aim of harmoniously integrating the glass holder into the furniture unit, enhancing its overall appearance while ensuring a coordinated and contemporary look.
