

TUBI & REGGITUBI

*HANGING RAILS
& BRACKETS*

FACILE DA MONTARE

I più gradevoli coordinati nel mondo dei tubi e reggitubi oggi presenti sul mercato, con caratteristiche tecniche ed estetiche superiori.

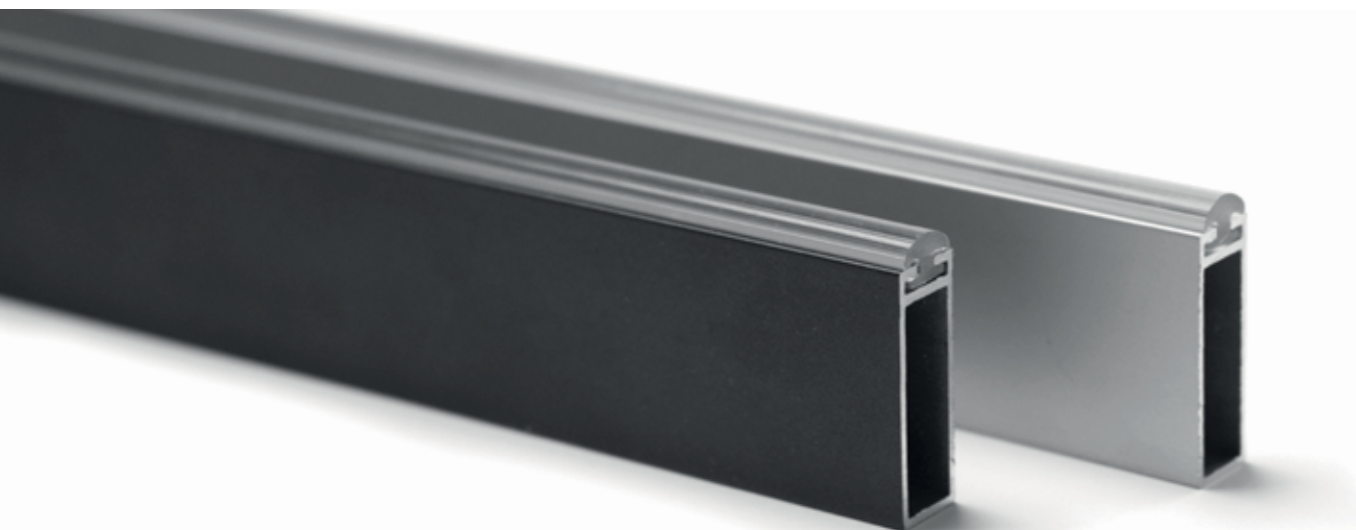

EASY ASSEMBLY

The most beautiful combinations of hanging rails and brackets available on the market, distinguished by top-quality, technical and aesthetical details.

LINEAR SISTEMA / SYSTEM

FINITURE TUBO: ANODIZZATE o VERNICIATE
HANGING RAIL FINISHES: ANODIZED OR PAINTED

► PAG.34 / PAGE 34

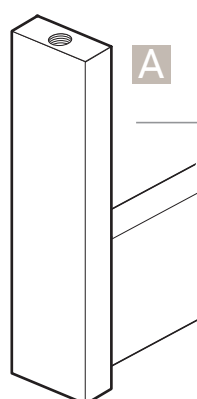

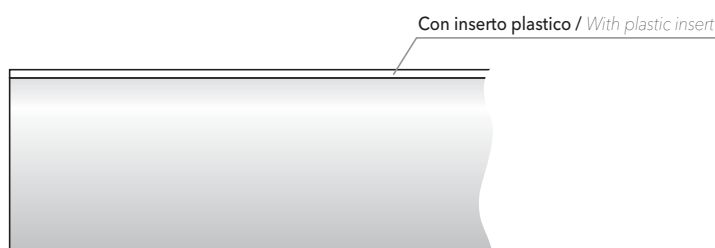

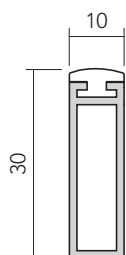

Sistema composto da tubo in alluminio 10x30 con inserito il profilo plastico trasparente di protezione e reggitubi in alluminio verniciato, perfettamente coordinati, che si incassano parzialmente nella sezione del tubo. Caratteristica principale: massimo rigore formale unito ad un'ottima resistenza al carico.

System composed of an aluminium rail, 10x30, with a clear plastic protective profile inserted and painted aluminium supports, perfectly coordinated, which fit partially into the rail cross-section. Main properties: accurately made with excellent load resistance.

▶ PAG.34 / PAGE 34

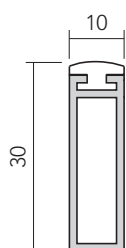

Nuovo sistema di tubi rettangolari 10x30 che amplia la serie "LINEAR". Il tubo in alluminio con profilo in plastica è abbinato all'elegante reggitubo disponibile nelle versioni destra, sinistra, centrale ad angolare. Il sistema di aggancio nascosto permette il fissaggio direttamente alla parte inferiore del coperchio, mantenendo inalterata la superficie superiore.

New rail system which implements our "LINEAR" series. The aluminium rail with plastic profile matches an elegant looking bracket which comes in the versions right handed, left handed, central and angular. The hidden anchoring system allows the brackets to be fastened to the lower panel surface and lets the upper surface completely flat.

STYLE

SISTEMA / SYSTEM

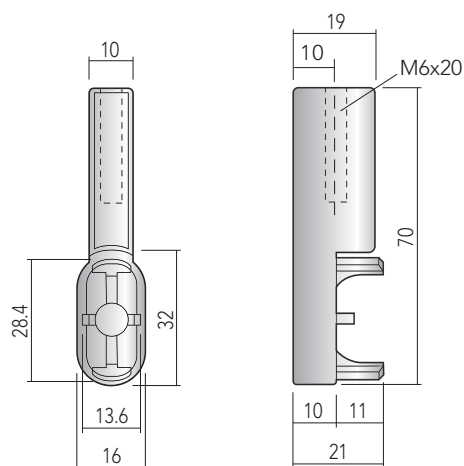

Sistema composto da un tubo 15x30 Sp. 0.4 mm e reggitubi in alluminio che si incassano parzialmente nella sezione del tubo. Il reggitubo centrale va fissato con una vite autofilettante in un forellino precedentemente fatto sul fianco del tubo, rendendo così il tutto funzionale e con un'estetica minimalista.

System composed of a 15x30 rail, 0.4 mm thick, and aluminium supports, which fit partially into the rail cross-section. The central support should be fixed in place by screwing a self-tapping screw into the small pre-drilled hole on the side of the rail, to make the fixture fully functional with a minimalist look.

PACKAGING SERVICE

Il grande successo ottenuto con il servizio di Confezionamento, ha richiesto alla Perin S.p.A. un'ulteriore impegno organizzativo, così da ampliare sia la struttura produttiva che il potenziamento di macchinari appositamente creati per tale servizio. Esigenze sempre più specifiche e personalizzate, hanno permesso di realizzare automazioni sofisticate per ottimizzare i tempi di produzione e un controllo maggiore per consegne puntuali e precise.

Moduli di conteggio dei vari accessori. Movimentazione e accorpamento. Stampa personalizzata dei sacchetti con le caratteristiche del contenuto, con i codici a barre o con il logo aziendale. Inserimento ferramenta e chiusura sacchetto. Pesatura elettronica computerizzata. Inscatolamento automatico. Un processo preciso e perfetto, collaudato ed efficiente.

Il servizio di Confezionamento prevede che i sacchetti possono essere richiesti anche con altre particolari caratteristiche: dalla classica confezione singola oppure a "corona" con 2, 3, 4 scomparti o più, contenenti prodotti diversificati.

Perin S.p.A. completa la gamma del servizio di Confezionamento, includendo anche prodotti più complessi, quali tubi appendiabiti o accessori con lunghezze variabili. Inoltre uno speciale macchinario permette la fornitura in Skin Pack o prodotti confezionati in Blister.

Ogni confezione o scomparto possono essere personalizzati singolarmente con l'apposizione di codici, descrizioni e/o marchi aziendali.

The great success of Perin S.p.A.'s packaging service has required additional organisational efforts from the company, so as to expand the production facility and develop the machinery created specifically for this service. Increasingly specific and personalised needs have meant that sophisticated automations could be implemented to optimise production times and provide greater control to ensure punctual and accurate deliveries.

Counting units for the various accessories; movement and bundling; customised bag printing specifying the contents, with bar code or company logo; hardware insertion and bag sealing; computerised electronic weighing; automatic packing: an efficient, accurate, tried-and-tested process.

The packaging service also allows for bags to be requested with other specific characteristics, from the classic individual pack to heat-sealed packaging with 2, 3, 4 or more sections containing different products.

Perin S.p.A. completes the packaging service range including some more complex products such as clothes hanging rails or accessories of varying lengths. Furthermore, a specific machine allows skin packs or blister packs to be provided.

Each package or section can be customised individually with codes, descriptions and/or company brands.

PACKAGING SERVICE: CUSTOMIZE, SPECIAL, EXTRA

PACKAGING SERVICE

A completamento della gamma prodotto, Perin Spa si è dotata di un moderno reparto di confezionamento per il tubo e per gli accessori necessari al suo montaggio soddisfacendo tutte le necessità della clientela, compresa l'apposizione di marchi e codici.

To complete the product range, Perin S.p.A. is equipped with a modern packing department for the rail and the accessories required for fitting, satisfying the customer's every need, including all stamps and codes.
